Master Use Permit: Review Timing: Currently this project is being reviewed under Master Use Permit (MUP) 3033227-LU. After the MUP has been issued, I will need to verify the project scope and application of development standards are consistent between the MUP and the building permit. Therefore, I am unable to complete review of the building permit at this time. Please incorporate any required conditions of the MUP decision into the plan set and note any changes between the MUP and building permit in your response letter.
